

Huffaker Spridget Rear Suspension Kit

This race proven three-link design is a large part of the “total package” that will make your car handle. The roll centers and roll axis were carefully developed and combined together with the front system, making this kit extremely formidable.

Included in the kit:

- **Adjustable three link trailing arms and brackets**
- **Adjustable horizontal Watts link**
- **Adjustable Carrera shocks**
- **Springs**
- **Upper and lower shock pickup points**
- **Rod ends and all fasteners required**
- **Watts link integral frame member (jig welded)**
- **Modified differential housing**
- **Instructions on installation and initial alignment specifications**

Provided by customer: (or we can provide, with a core charge)

- **Stock differential housing (late style MG Midget preferred)**
(in good clean usable condition, with **good** threads and seal surface on ends)
- **Stock bolt-in leaf spring plates (the style that fits your tub...)**

Note:

Modifications to the chassis include: Positioning and weldment of watts link frame, upper shock pickup, doubler plates and central trailing link bracket, location and hole boring for shock to penetrate tub. We will modify your differential housing and send it to you.
